ABOUT TWEAKKER

Tweaker offers the industry leading OTA device connectivity service for MVNOs. Furthermore, we provide innovative on-device connectivity management solutions for Device makers around the world.

Exceptional Device Knowledge

Tweaker inherits 11 years of carefully obtained device knowledge through its parent company Mobilethink. More than 3,000 mobile devices have passed through the device management test departments at Mobilethink.

Business Model

We provide a straight forward licensed offering. The license is based on a monthly service fee and a per configuration fee.

Zero upfront investment.
