

OTA CONFIGURATION MADE EASY

The most cost-effective OTA solutions for MVNOs

THE SOLUTION

Unmatched coverage. +300 brands. +3100 phone models. +30 languages.

“Today 30% of all mobile device support issues are related to faulty or missing internet & MMS settings.”

Tweaker is a powerful HTTP Web Service for sending OTA settings to mobile devices at anytime, anywhere. Initiated through an API-call or a customer-facing interface, an SMS is sent to customers' mobile devices setting up Internet and MMS in seconds.

1 Build your own OTA interfaces

Get API access to our unmatched database of mobile device settings. It can be seamlessly integrated with your own customer care interface.

2 Let Tweaker build your OTA interfaces

Don't have the resources to develop your own interface? We can build you a customized interface enabling you and your customers to access the world's largest database of mobile settings.

No matter what solution you need, we offer **a 30 day FREE trial**

“We only team with industry leaders and in the connectivity provider space that means Tweaker.”

Paul Walsh, Tesco Mobile

Reduce valuable customer care time

Improve your ARPU by bringing down time spent on each customer care call.

ABOUT TWEAKKER

Tweakker offers the industry leading OTA device connectivity service for MVNOs. Furthermore, we provide innovative on-device connectivity management solutions for Device makers around the world.

Exceptional Device Knowledge

Tweakker inherits 11 years of carefully obtained device knowledge through its parent company Mobilethink. More than 3,000 mobile devices have passed through the device management test departments at Mobilethink.

Business Model

We provide a straight forward licensed offering. The license is based on a monthly service fee and a per configuration fee.

Zero upfront investment.
